**DETAILED ACTION**

***Election/Restrictions***

The Examiner telephoned applicant's counsel, Mr. Fasse, and presented the election requirement below. Mr. Fasse responded by phone to the Examiner. The Examiner found the response to be unclear. Therefore, in order to provide a clear record, the election requirement is being presented in writing.

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Figure 4, drawn to the torsional box 53 formed by the vertical walls 52 and cover skins 55a and 55b.
- II. Figures 5 and 6, drawn to the box elements 154 formed by cover skins 55a and 55b with sparless pivoted joints 168 and extending shanks 154a and 154b.
- III. Figures 5 and 7, drawn to the box elements 154 formed by cover skins 55a and 55b with spars 177 and no extendable shanks.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 4174

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

- I. Claims 32-37
- II. Claims 38, 42-47
- III. Claims 38, 48-49

The following claim(s) are generic: claim 1.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: not all species have square shaped torsional boxes, not all species have spars, not all species have extendable shanks.
